

Automatic Thermal Lamination Machine SAFM 800 / SAFM 1000

Characteristics:

SAFM Series automatic lamination machine is compound machine aimed to laminate thermal film. This machine is mainly equipped with automatic paper feeding system, laminating system and divisional cutting system. The electrical devices are controlled by PLC system and the heating roller heat up through the circulation of heated oil in order to insure the accuracy of laminating temperature. The whole machine has compact structure with high degree of atomization and humanity operation and it could be the good choice for the enterprises of large and medium scale which need quality lamination. This machine has the features of convenient operation, fast speed, high pressure and accurate precision.

Technical Data

Model	SAFM 800	SAFM 1000
Max. Paper Dimension	780 x 1040 mm	980 x 1040 mm
Min. Paper Dimension	280 x 300 mm	280 x 300 mm
Paper Weight	125 ~ 500g/ m ²	125 ~ 500g/ m ²
Machine Speed	40 mtr / Min	40 mtr / min
Laminating Pressure	5 ~ 10 Pa	5 ~ 10 Pa
Laminating Temperature	180°C	180°C
Pre coated Film Type	All kind of Pre coated Film Can be use.	
Power	22 KW	22kw
Weight	1.5 Ton	1.8 Ton
Overall Dimensions	4800 x 1650 x 1700 mm	4800 x 1850 x 1700 mm
